## Letter of Recommendation

It is my pleasure to state that the Post Graduate Diploma in Clinical Cardiology (PGDCC), was a full time course started by IGNOU, wherein selected doctors were trained in Hospitals for a 2 year full time curriculum in Non-Invasive Cardiology. PGDCCs have thus been trained to handle all non-invasive aspects of cardiology. Leading Hospitals, recognizing their potential, are utilizing PGDCCs for running their cardiology units, where they handle emergencies, Non-Invasive Labs & ICUs. PGDCC doctors are also involved in spreading awareness, prevention & treatment of cardiovascular diseases at grass root level to the common man in India. PGDCCs are helping in bridging the Gap between the General Practitioners & the Invasive Cardiologists.

PGDCC doctors have the skills, which can make a difference between life & death, in a patient. They thus are a great asset to our organization & to the society as a whole.

These doctors have made a great contribution in tackling a large chunk of the huge Cardiac Disease burden of the country.

I strongly recommend the recognition of PGDCC doctors in the larger interest of the society

My best wishes for a bright future to the young brigade.

Your's Truly

**Dr. SIBASIS S. SAHOO**
